**MOSQUITO SHIELD
MOZZGO®
*Letter of recommendation***

The South African Society of Travel Medicine (SASTM) has studied the documentation presented by Mosquito SHield regarding the efficacy of MOZZGO®. It has also had access to the tests carried out by the South African Bureau of Standards (SABS) on this product.

SASTM is of the opinion that MOZZGO®, used in accordance with the manufacturer's instructions, can be recommended as an effective insect repellent to be used on fabrics, the efficacy of which has been established against the malaria vector, the Anopheles mosquito.
